WHERE IT GOES
This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut 12 mm plywood to 1,010 x 535 mm, square.
Round the corners about 5 mm and sand the edges.
Fit: rests on the top faces of the two low rails, flush with their outside faces, 5 mm clear of the legs at each end. It is slid in from the front, above the front low rail, then lowered.
It carries the two ballast slabs, side by side, 40 mm apart.
Check: it lies flat on both rails and does not touch a leg.
