WHERE IT GOES
This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Print in PETG standing on one 60 x 60 mm end, so the V needs no support: 100 long, 60 wide, 60 tall.

The 90 degree V runs the full length: 50 mm wide at the top, with a 5 mm flat each side, its bottom 35 mm above the base. It holds round bar from about 8 to 45 mm across.

Two 6.6 mm holes from the V bottom to the base, 25 mm each side of the centre; counterbore 11 mm down to 12 mm above the base.

Fit: two M6 x 30 cap screws into threaded grid positions 50 apart.

Check: a 20 mm bar rests on both faces of the V.
